What is edX?

edX is the education movement for restless learners. Together with our founding partners Harvard and MIT, we've brought together millions of learners, the majority of top-ranked universities in the world, and industry-leading companies onto one online learning platform that supports learners at every stage. And we're not stopping there—as a global nonprofit, we're relentlessly pursuing our vision of a world where every learner can access education to unlock their potential, without the barriers of cost or location.

Help us in our mission to bring education to everybody, everywhere

World-class content

edX offers the highest quality online courses and programs from **universities and organizations** who share our commitment to excellence in teaching and learning.

What can you promote on edX?

Courses

edX courses let learners explore subjects they're interested in and learn something new! No matter what subject they are interested in, short courses are an easy, attainable place to start. All courses on edX are from top-ranked universities or industry-leading companies for quality that you can trust.

edX programs

Program commision > course commision

edX learners have the opportunity to buy individual courses or programs. The programs are made up of a group of courses. Each course offers an individual certificate but at the time the learner completes the courses of the program, they obtain an additional program certificate.

The learner has the opportunity to buy all the courses in the program through a **bundle purchase**, obtaining a 10% discount on the total value of the program, which means greater benefit for you, since the value of the program is higher than the value of the course

Here you can find the **comparison of all edX products**.

XSeries

A series of courses to develop deep knowledge in interesting and popular subjects.

Created by world-renowned experts and top universities, XSeries programs provide a deep understanding of exciting and in-demand fields. Earn a certificate of achievement to demonstrate your knowledge.

MicroMasters Programs

MicroMasters® programs are a series of graduate level courses from top universities designed to advance the learner's career. They provide deep learning in a specific career field and are recognized by employers for their real job relevance. Students may apply to the university offering credit for the MicroMasters program certificate and, if accepted, can pursue an accelerated and less expensive Master's Degree.

MicroBachelors programs

No matter if the learners have some or no college experience, MicroBachelors® programs are built for adult learners looking to progress their career. Created by top universities and influenced by Fortune 1000 companies, edX's MicroBachelors programs are the only path to a Bachelor's degree that make learners job-ready today and credentialed along the way. Now learners don't have to wait years to change their future.
